# MOHAN RAJ

## Quality Analyst

Aspiring Quality Analyst with a strong foundation in automation testing and a Master of Computer Applications degree. Expert in Selenium WebDriver, TestNG, Cucumber BDD, and Playwright, proficient in Java, JavaScript, and TypeScript. Successfully delivered end-to-end testing for SaaS platforms and validated complex SDK integrations in key projects. Eager to apply technical expertise to ensure product quality and drive efficient testing processes.

Portfolio

## SKILLS

- Automation Testing
- Selenium WebDriver
- TestNG
- Cucumber BDD
- Playwright
- Programming Language
- Java
- JavaScript
- TypeScript
- API Testing
- Postman
- Rest Assured
- CI/CD & Version Control
- Jenkins
- Git

## EXPERIENCE

**JUNIOR QUALITY ANALYST**
NEOKRED Technologies | Bangalore | 07/2025 - Present

**SOFTWARE TEST ENGINEER**
MOVATE Technologies | Chennai | 11/2023 - 07/2025

## EDUCATION

**MCA**
Madras University | 01/2023

**BCA**
D.G Vaishnava College | 01/2020

**HSC**
Bharathi Matriculation Higher Secondary School | 01/2017

## PROJECTS

**PERKLE – VOUCHER SAAS AND API PLATFORM**
https://dashboard.perkle.store/login | 07/2025 - Present

- Owned end-to-end testing of voucher lifecycle workflows including ordering, issuance, delivery, redemption, refunds, and dispute management.
- Designed, developed, and executed comprehensive test cases and test scenarios ensuring high coverage across functional and business-critical flows.
- Automated web application testing using Selenium WebDriver with Java, TestNG, Cucumber (BDD), and Maven, improving regression efficiency and reducing manual effort.
- Performed robust API testing using Postman and developed automated API test suites using Rest Assured to validate request/response, authentication, and business logic.
- Conducted backend data validation using MongoDB, ensuring data integrity for voucher status, transactions, and OTP-based workflows.

## LANGUAGES

Tamil

English

Kannada

- Debugged and analyzed backend issues by inspecting API logs, database records, and system responses to identify root causes and ensure faster defect resolution.
- Worked with Redis to verify caching behavior and ensure consistency of frequently accessed data in high-load scenarios.
- Played a key role in ensuring system scalability and reliability during bulk voucher distribution and high-traffic scenarios.
- Validated encryption, payment workflows, and error handling categories for secure transactions.
- Utilized Docker for maintaining consistent test environments across different deployments.
- Integrated automation test suites with Jenkins CI/CD pipeline for continuous testing.

### PROFILEX – USER IDENTITY & DEVICE INTELLIGENCE PLATFORM

07/2025 - Present

- Validated integration of Device Intelligence SDK in mobile and web applications, ensuring accurate capture of device fingerprinting data such as device ID, IP address, OS, and behavioral attributes.
- Tested SDK data flow from client applications to backend services, ensuring correct transmission, storage, and processing of device intelligence data.
- Conducted API testing using Postman and Rest Assured to validate device data ingestion, risk scoring, and response payloads.
- Verified alert generation and capture mechanisms when rule sets were triggered, ensuring proper notifications and system responses.
- Managed test cases, test execution, and reporting, ensuring proper test coverage and traceability.
- Validated security and fraud detection scenarios including multiple device usage, suspicious login attempts, and anomaly detection workflows.
- Logged and tracked defects in Jira with detailed analysis, improving issue resolution turnaround time.
